

Muhammedamin Gebi Sinkero

Computer Engineering Student

Bursa/Türkiye | muhegebi2021@gmail.com | +905344154918 | LinkedIn | Github

Professional Experience

Software Developer Intern	March 2026 - Present
<i>Alphastellar</i>	<i>Bursa, Türkiye</i>
- Designed and built a hybrid Project Management + Version Control System (RepoFlow) from scratch using Clean Architecture. - Implemented secure authentication using Keycloak (OAuth2/OIDC) with JWT Bearer tokens, including automatic user synchronization from identity provider to local database without manual registration. - Applied Repository Pattern and Dependency Injection to decouple business logic from data access, ensuring fully testable components and cleaner controller implementations.	

Education

Uludag University	Bursa, Türkiye
• Bachelor of Computer Engineering • Expected Graduation Date: July 2026	2022-Present
University Of Silesia	Katowice, Poland
• Erasmus Exchange Program	Sep 2024 – Feb 2025

Projects

DepremKit , AI-Powered Earthquake Solutions Hackathon
• Developed A React Native app that helps you organize your emergency preparedness bag for earthquakes and other emergencies. • Tech Stack: React Native, SQLite
CDC Data Pipeline System , School Project
• Implemented Change Data Capture system using PostgreSQL triggers and Python polling mechanism. • Automated data synchronization between SQL and NoSQL databases with <5-second latency. • Built reporting module analyzing 1000+ change events using MongoDB aggregation pipelines. • Tech Stack: PostgreSQL, MongoDB, Python, SQLAlchemy
Hotel Management System , School Project
• Led team development of a hotel management system using MVC architecture with C# windows forms and MongoDB • Designed and implemented data models (Room, Guest, Reservation) with MongoDB BSON attributes and repository pattern • Developed DAO layer with CRUD operations using MongoDB.Driver for database interactions • Tech Stack: C#, Windows Forms, MongoDB, MongoDB.Driver
Unmanned Ground Vehicle , Teknofest Project
• Worked on hardware and software integration using Raspberry Pi, sensors, and DC motors. • Designed control logic for movement and obstacle detection. • Gained hands-on experience with embedded systems and sensor data handling. • Tech Stack: Raspberry Pi, Python, Motor Drivers, Sensors.

Skills

Programming: Python, JavaScript (NodeJs), C#,
Frameworks and Libraries: React, Express,Entity Framework ASP.NET Core
Databases: MongoDB, PostgreSQL, SQL Server, SQLite
Tools: Git, GitHub, Postman, Swagger, Docker, Keycloak, OIDC/Auth2.0
Languages: Turkish (C1), English (B2), Arabic (B1)

Achievements

Türkiye Scholarship	Sep 2022 - present
Erasmus Plus Exchange	Sep 2024 - Feb 2025
AI-Powered Earthquake Solutions Hackathon 2 nd place Winner	May 2025
